If this be, as we suppose it is, the view taken by Dr Stewart, some credit must be given to the Governor for the proposal that the Head. Master and Acting Colonial Secretary shall act as Chairman of the Commission, because no man, not even excepting Dr Eitel, knows more about practical education than Dr Stewart.

There are several features in the proposals which the Commission will be asked to consider which may strike one as peculiar. If the Colony erected a large school building, it does not appear that the cost will be materially lessened or increased, whether the Institution be used as a Central School or as a Collegiate Institution. Indeed, so far as salaries are concerned, a higher entertain the notion of so large a scheme have in some measure been prepared for it; and to saddle the present taxpayers with the maintenance of a College with a staff of highly-trained men before No one, it is true, can claim the chtracter of a sagacious administrator who fantastic dreaming; and it is to be practical solution of the problems of education affecting the Colony as it now exists, with a reasonable allowance for hoped-for progress, is all that they as all existing landmarks, so as to avoid certain and humiliating failure. An idea has been formed by some one that Eitel says, the five preparatory schools which are supposed to act as feeders for the higher-class institution, "would be made up of pupils from the very poormanifestly absurd; and the whole histhat such is the case. Again, this exasperating iteration as to there being no system-no "periphery"-is a thing hold of and exposed by the Commission now suggested. It is arrant folly to talk about the last eighteen years of educational experience having been in-

And if the five new schools be taken into account—they will probably not be built for less than \$40,000 -together with the maintenance of five new English masters, the matter of cost assumes an aspect even 2 p.m .- Auction of Household Furniture, more serious than that presented dre., at the residence of Miss Lamb (by | by the estimate for the new Central School. This desire of the present Head of the Executive to aim so high, and to reach away far into futurity, has attached to it a financial consideration, HONGKONG DISPENSARY, in addition to the fact that it leads him into schemes which are regarded as premature. Is it necessary as yet to of education until the native community the Colony has produced the students? fails to look into the future; but there is a wide gulf between sagacity and hoped that the members of the Commission will bear in mind that a men of understanding are called upon to give. In a Colony like Hongkong, the Government must walk warily before it can run safely, in matters educational as well as things political or municipal; and care must be taken in this instance not to run away from the so-called Collegiate Institution would be self-supporting; but, as Dr est classes." THE TEA STEAMERS AND THE

TEA SEASON. The following notes on the week's work done at Hankow, and the steamers (Per & E. A. & O. Telegraph Co.'s Line.) which have left since last report. are culled from the various reports which appear in our Shanghai contemporaries to hand this morning. The Loudoun Castle left her moorings on the Albanians. the morning of the 26th, at about the same hour, 3 o'clock a.m. as the Glencoe, and is thus, as nearly as possible, four days behind her. "She has many wellwishers in Hankow," says the Courier correspondent; "and it is thought by some that she will be able to get over the course in as short a space of time as the Glencoe. Indeed I heard one enthusiastic individual express the conviction that she will succeed in overtaking her, and land her teas as early, if not earlier. She is in splendid trim in every way, and will no doubt run her opponent very close. There was a rumour current before the Glencoe left that the piston of her low-pressure cylinder was not as strong as it ought to be, but there may be nothing in it." The Loudoun takes 2,743,280 pounds tea, against the Glencoc's 3.035,668. Her cargo was made up of 16,044.77 piculs Hankow tea, 4,529.83 piculs Kiukiang and 180.90 piculs tea dust; total, 20,755.50 piculs. She passed Woosung at 8.30 on the evening of the 27th, (not having gone aground this time) which would give her 41 hours fully. With regard to the run down the river we read that "the time occupied in bringing the Glencoe down from Hankow to the Red Buoy, was, by official log, this year 38 hours. Last year it was reported that the Glenartney was brought down in the quickest time on record-I day and 19 hrs. (i.e. 43 hrs.)—but we have been informed that this year's pilot of the | The Spanish big Manuel arrived at Manila Glencoe, Mr Fiben, three years ago on the 29th May, 13 days from Hongkong. brought the Glenartney down, according to official time, in 39 hours." To THE P. & O. steamer Mizzapore, with the this we could only add that the Glencoe's time last year was only 40 hours. The Glenartney was the third steamer to day. THE KOREAN QUESTION. (Japan Gazette.)

Information has been received to the effect that the Russian mission sent to Kerea to negotiate a treaty-of friendship and commerce between the two countries, has been unsuccessful. The letter or proposition sent to the Korean authorities having been re jected, an armed party was sent on shore to demand un explanation, or reasons for rejection, from the governor. On the approach of the armed party the officers and for England, by way of America, by the sentries posted near the residence of the governor ran towards the gates of the town to close them against the barbarians. The governor, however, had an interview with 26th, the former from Amoy and the latter | the officer in charge of the expedition, the latter making the pertinent inquiry how it was the Koreans were unwilling to make a treaty with Russia while satisfied to do so with Japan, a nation as foreign to Korea as is Russia? The reply of the governor is unknown, and the Russian question is as vet unanswered.

> The correspondent of the Mai Nichi Shinbun describes the intercourse of Japanese residents with the Korean people in amusing terms. Large crowds of Koreans assemble every fine day in the foreign settlement to gaze in wonder and astonishment at the appliances of civilization introduced by the Japanese settlers, and it is only on a rainy day that Fusan is free, consequent upon the government prohibiting the use of umbrellas and shoes. The Koreans are a mild and industrious people, and excellent servants car be obtainted for from three to seven yen per month. The Koreans recognize no force but that of wanrioku (physical strength) as they are quite unable to understand reason or argument. The officials are very corrupt. officers of the highest rank being frequently guilty of larceny, which is considered a very venial offence. When inferior officials are detected in theft they are simply beaten. which is not considered a disgraceful punish.

In translations from native papers we find the following:—

Immediately upon the departure of the Ticonderoga from Fusan a number of guns were fired in honour of the glorious expulsion of the enemy. The authorities are collecting a number of troops in and around Fusan to guard against contingencies, (such as the return of the Ticonderoga) and to protect the country from invasion. Upon the aproach of the Ticonderoga the officials and people became greatly excited, and when it was known that it was an American ship, memory of past events served to increase their dismay. The suggestion of Mr The Monocacy left this morning (29th) for | Consul Kondo that an official should be sent to board the vessel and ascertain her mis-

We understand the departure of the Ticonderoga, which vessel was to have left for Korea to-day (27th) has been postponed until the early part of next week. The course of action about to be followed by Commodors Shufeldt is not positively known, but it is supposed he will proceed to Korea alone and cause a letter to be presented to the King of the United States for a treaty of friendship and commerce. Should the letter be refused, or treated with indignity, or an evasive or insulting answer be returned Commodore Shufeldt will, in the exercise of discretionary power, press the matter still further in an amicable manner, or call to his aid all or any portion of the United States fleet now on the Uhina station, telegraphing atonce to Washington for final instructions. The vessels of the fieet now serving on this station available for immediate service are writing May 24th, gives the following the Richmond, 14 guns, Captain Benham, carrying the flag of Rear-Admiral Patterson; H.S. Perasus, left this morning for the Alert, 4 guns, Commander Huntington, and the Ashuelot, 6 guns, Commander Johnson. The last named vessel is just out of the Pootung dock where she has been undergoing very extensive repairs, to which it is also the intention of the U.S. government to subject the Palos and the Monocacy, the remaining vessels of the United States fleet in these waters. # Intimations. THE CHINA REVIEW. HE widely-expressed regret at the discontinuance of Notes & Queries on China and Japan, has induced the publishers of this journal to issue a publication similar in object and style, but slightly modified in certain details.

THE CHINA REVIEW, or Notes and Queries on the Far East, is issued at intervals of two months, each number containing about 60 octavo pages, occasionally illustrated with lithographs, photographs, woodcuts, &c., should the papers published demand, and the circulation justify, such

The subscription is fixed at \$6.50 postage paid, per annum, payable by non-residents in Hongkong half-yearly in advance.

The publication includes papers original and selected upon the Arts and Sciences, Ethnology, Folklore, Geography, History, Literature, Mythology, Manners and Customs, Natural History, Religion, &c., &c., of China, Japan, Mongolia, Tibet, the Eastern Archipelego and the "Far East" generally. A more detailed list of subjects generally. A more detailed list of subjects upon which contributions are especially invited is incorporated with each number. Uriginal contributions in Chinese, Latin, French, German, Spanish, Italian or Portuguese, are admissible. Endeavours are made to present a resumé in each number of the contents of the most recent works bearing on Chinese matters. Great attention is also paid to the Review

department. Notes and Replies are classified toge ther as "Notes" (head references being given, when furnished, to previous Note or Queries), as are also those queries which though asking for information, furnish nev or unpublished details concerning the mat ter in hand. It is desirable to make th Queries proper as brief and as much t the point as possible.

The China Review for July and Augus 1875, is at hand. It says that forty-two essays were sent in to compete for the bea paper on the advantages of Christlanity fo the development of a State. All our learn ed societies should subscribe to this scholar and enterprising Review. It is a sixt paged, bi-monthly, repertory of what sch lars are ascertaining about China. Th lecture on Chinese Poetry in this volume alone worth the price of the Review. A dress China Review, Hongkong. - Norther

Christian Advocate (U.S.) Trubner's Oriental Record contains the fo lowing notice of the China Review :- " Th is the title of a publication, the first number of which has lately reached us from Hon kong, where it has been set on foot as some respects a continuation of Notes as Queries on China and Japan, the extinction of which useful serial a year or two ago ha been much regretted in Europe as well in China. The present publication, judgi by the number now before us, is intended occupy a position, as regards China and neighbouring countries, somewhat simi to that which has been filled in India by Calcutta Review. The great degree of tention that has been bestowed of late year upon the investigation of Chinese literatur antiquities, and social developments, to s nothing of linguistic studies, has led to accumulation of important stores of infor ation, rendering some such channel of pu licity as is now provided extremely des able; and contributions of much intermay fairly be looked for from the memb of the foreign consular services, the Chin Customs' corps, and the missionary box among whom a high degree of Chin scholarship is now assiduously cultivat and who are severally represented in the number of the Review by papers high creditable to their respective authors. a paper on Dr. Legge's She King, by Rev. E. J. Eitel, to which the place honour is deservedly given, an excel summary is presented of the chronolog problems and arguments involved in conexion with this important work. So translations from Chinese novels and pla are marked by both accuracy and freshn of style; and an account of the caree the Chinese poet-statesman of the eleventh century, Su Tung-p'o, by Mr. E. C. Bowra, is not only historically valuable, but is also distinguished by its literary grace. Beside notices of new books relating to China and the East, which will be a useful feature of the Review, if carried out with punctuality and detail, we are glad to notice that "Notes" and "Queries" are destined to find a place in its pages also. It is to be hoped that this opening for contributions on Chinese subjects may evoke a similar degree of literary zeal to that which was displayed during the lifetime of its predecessor in the field, and that the Ohina Review may receive the support necessary to insure its continuance. The publication is intended to appear every two months, and will form a substantial octavo magazine.

# THE CHINESE MAIL.

This paper is now issued every day. The subscription is fixed at Four Dollars per annum delivered in Hongkong, or Seven Dollars Fifty Cents including postage to Coast ports.

It is the first Chinese Newspaper ever issued under purely native direction. The chief support of the paper is of course derived from the native community. amongst whom also are to be found the guarantora and accurities necessary to place it on a business andlegal footing.

The projectors, basing their estimates upon the most reliable information from the various Ports in China and Japan,-Australia, California, Singapore, Penang, Salgon, and other places frequented by the Chinese,—consider themselves in guaranteeing an ultimate circulation of between 8,000 and 4,000 copies. The advantages offered to advertisers are therefore unusually great, and Sir the foreign community the foreign community generally will find it to their interest to avail themselves of

The field open to a paper of this descrip tion-conducted by native efforts, but progressive and anti-obstructive in tonein almost limitless. It on the one hand commands Chinese belief and interest while on the other deserves every aid that can be given to it by foreigners.
Like English journals it contains Editorials—with Local, Shipping, and Commercial News and Advertisements.

Subscription orders for either of the above may be sent to GEO. MURRAY BAIN, China Mail Office.
